

Take a Hike

The Dinosaur area can be found in the woods just east of the Group Campground. There are a lot of trails in this area, and most are not marked. To help we made a simple and not-completely-perfect map. Please note that the trail colors on the map DO NOT match any blazes in this area of the park. They are just added as a simple reference.

Hiking Map to the Dinosaurs in Allaire

Easy Path (Purple)

Park, and lock your car. Do not block gates or park on any bushes/trees.

Hike the campground road towards (and through) the yellow gate.

Keep right after the yellow gate onto a trail.

Go past a second gate.

Stay right when the trail splits.

Stay straight until you notice the trees change.

Watch for Huts on your right, and the dinos to your left in the woods.

There are a lot of mountain bikes along the trails near the parkway

This hike is not very long. I believe our last visit was a bit less than a mile total, there and back.

Alt Path (Blue)

If you follow our blue route you will be brought closer to the Garden State Parkway. There are also more hills and more mountain bikers in this area.

Alt Path 2 (Orange)

The orange route brings you into the group campground along the paved path. Once near Site E you will enter the woods, head down the hill and find which trail will loop you around the dino area.
